

Safe System Approach

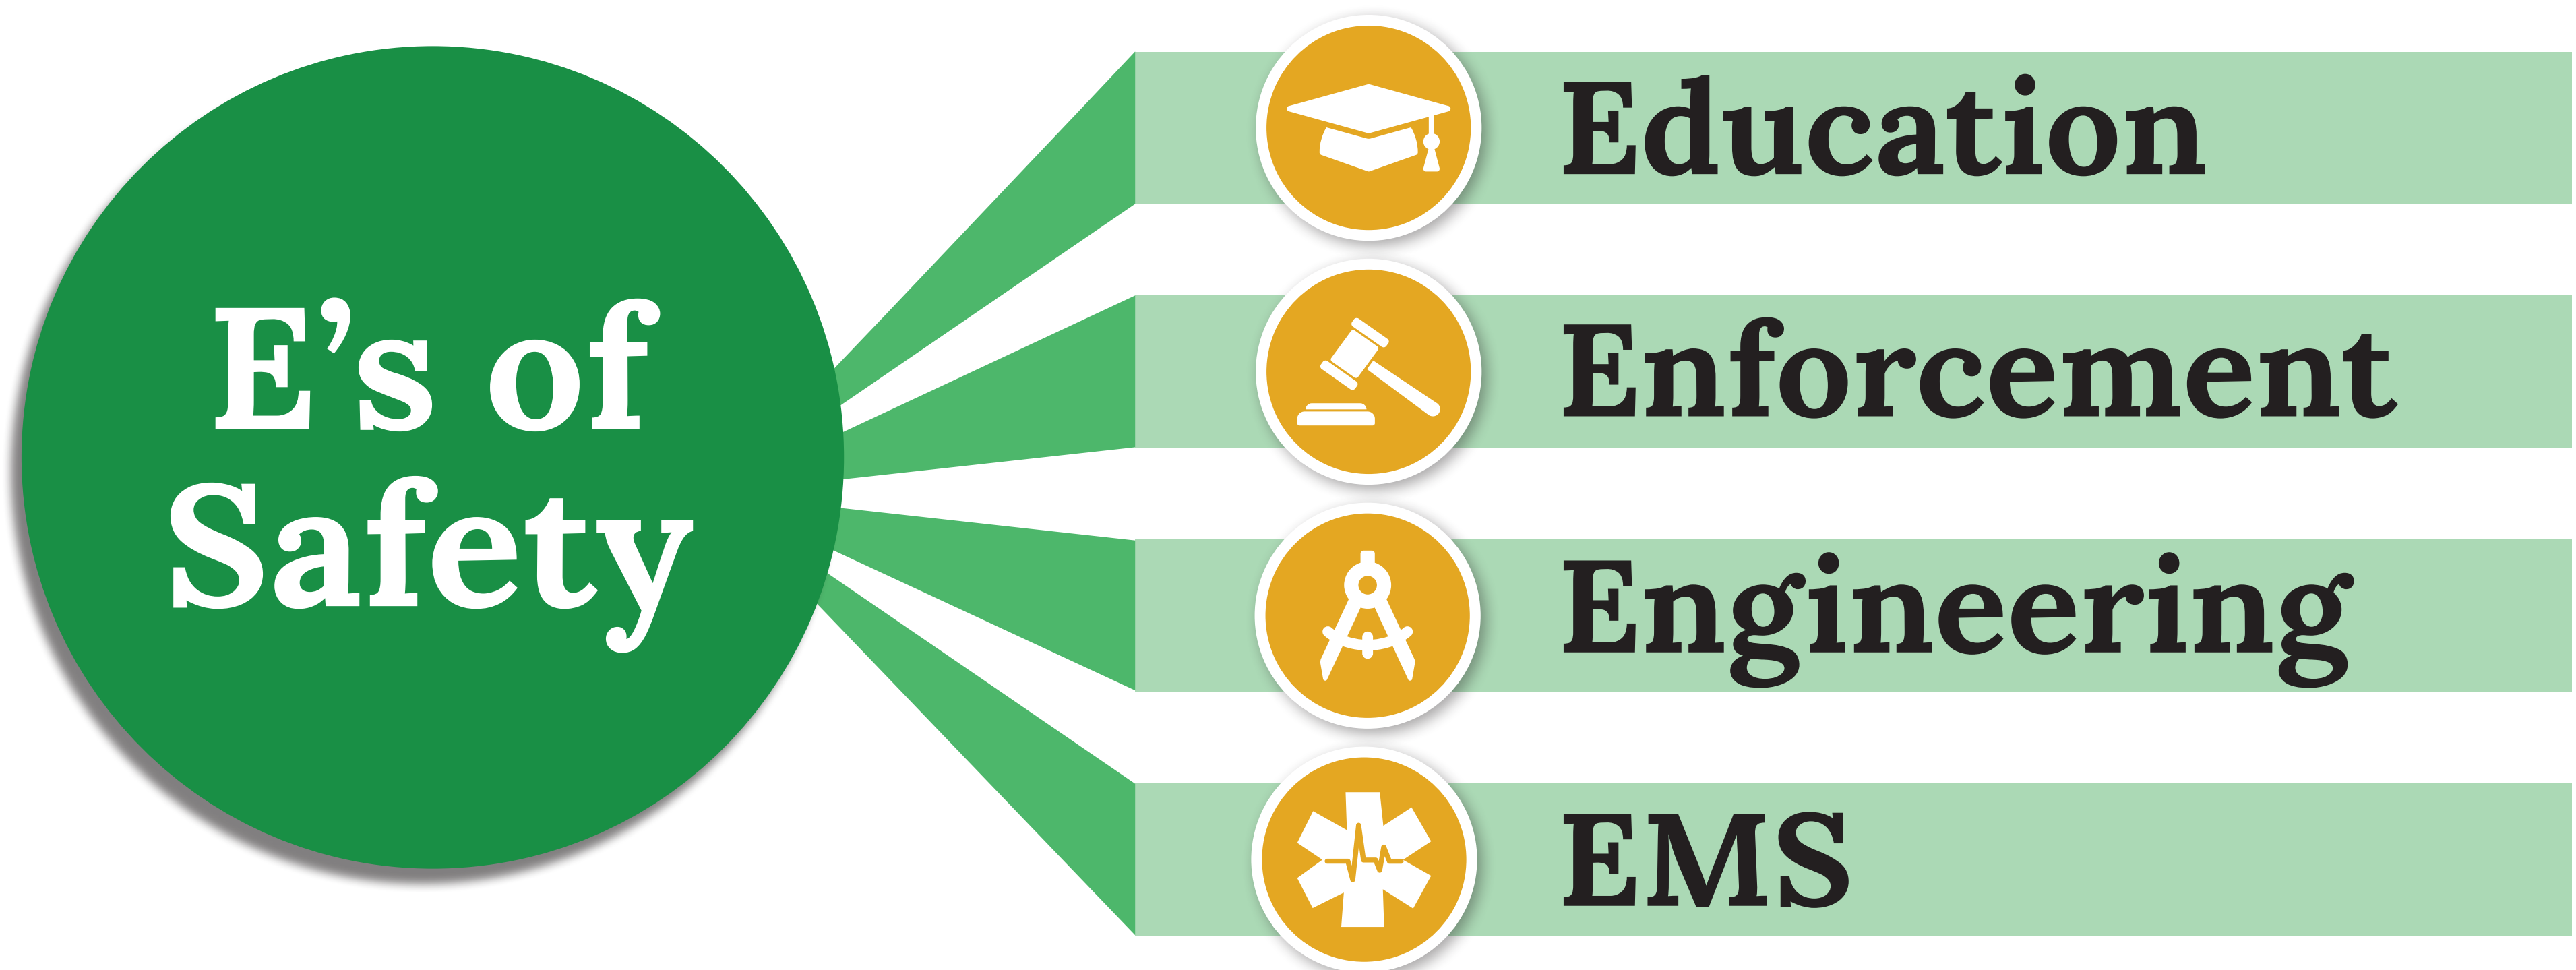

The Federal Highway Administration has developed the Safe System Approach to reach

ZERO traffic deaths and serious injuries

The approach is designed to **anticipate human mistakes and limitations** while preventing death and serious injury by **proactively identifying and addressing risks**.

Improving transportation safety involved a **comprehensive approach** leveraging a range of perspectives and technical expertise. Strategies and projects identified for Gallatin County will require partnerships between **engineers**, law **enforcement** personnel, and **educators**, along with support from **everyone** in the community! Timely response and coordination with emergency medical service providers also plays a critical role in reducing fatalities and serious injuries.
